Clearing House of the Year  
Dubai Gold & Commodities Exchange

## About

DGCX is the Middle East's largest digital marketplace where traders manage risk, protect value and grow portfolios by buying and selling commodities and currencies at a future date, for an agreed price. DGCX is born, built, and based in the UAE since 2005, owned by Dubai Multi Commodities Centre (DMCC), the world's number one free zone.

The DGCX owns and operates the region's largest and only multi-asset Clearing House - Dubai Commodities Clearing Corporation (DCCC). The exchange and clearing house are regulated by the Securities & Commodities Authority (SCA) in the UAE.

### Our Mission:

To consolidate and grow our position as the region's trusted exchange and clearing house of choice.

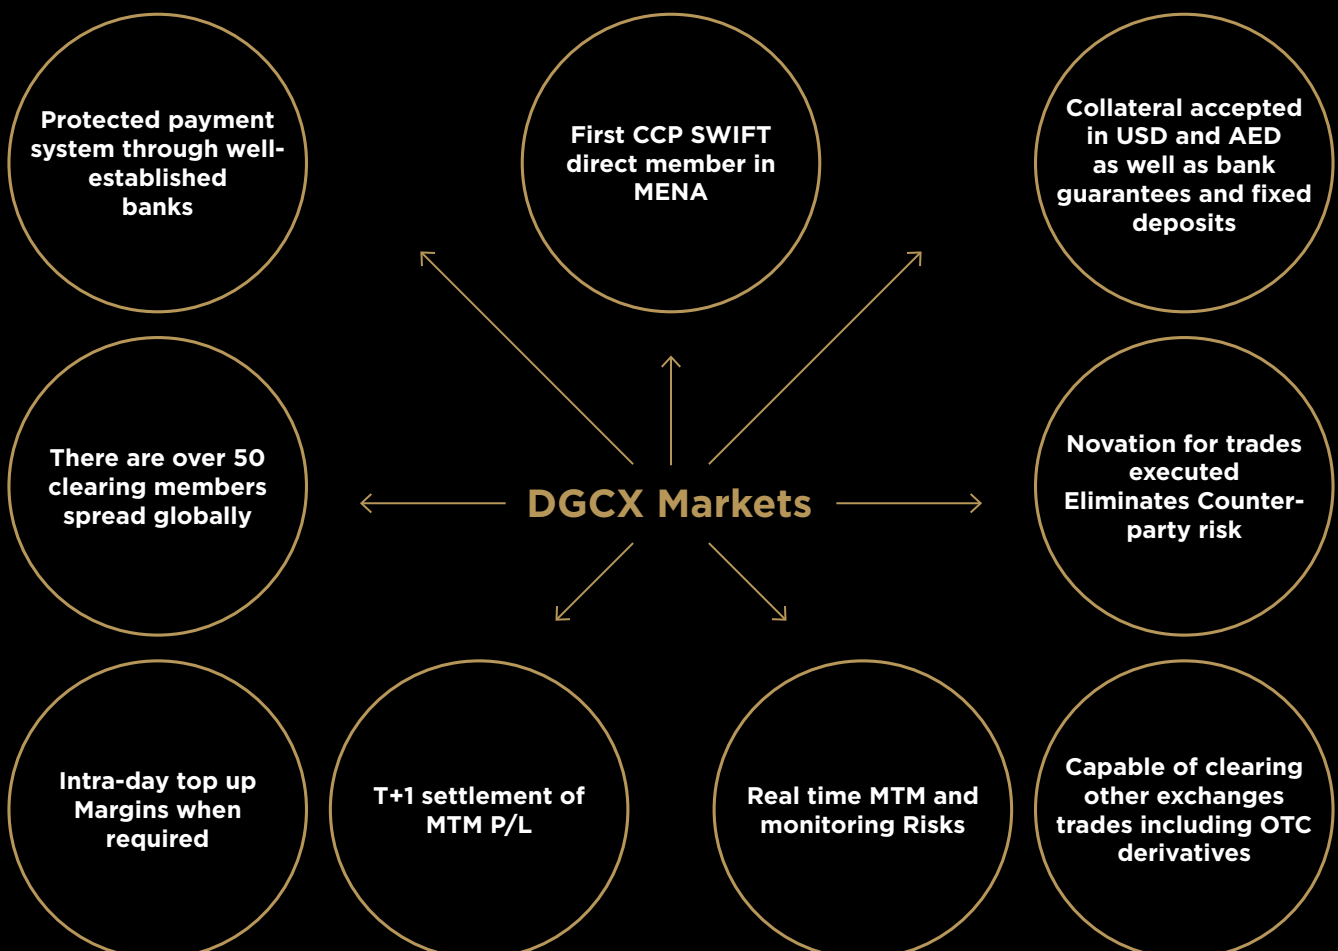

### Our Purpose:

To play an active role in the growth of a vibrant financial sector, contributing to a better and more prosperous society in a diversified knowledge economy.

### Our Vision:

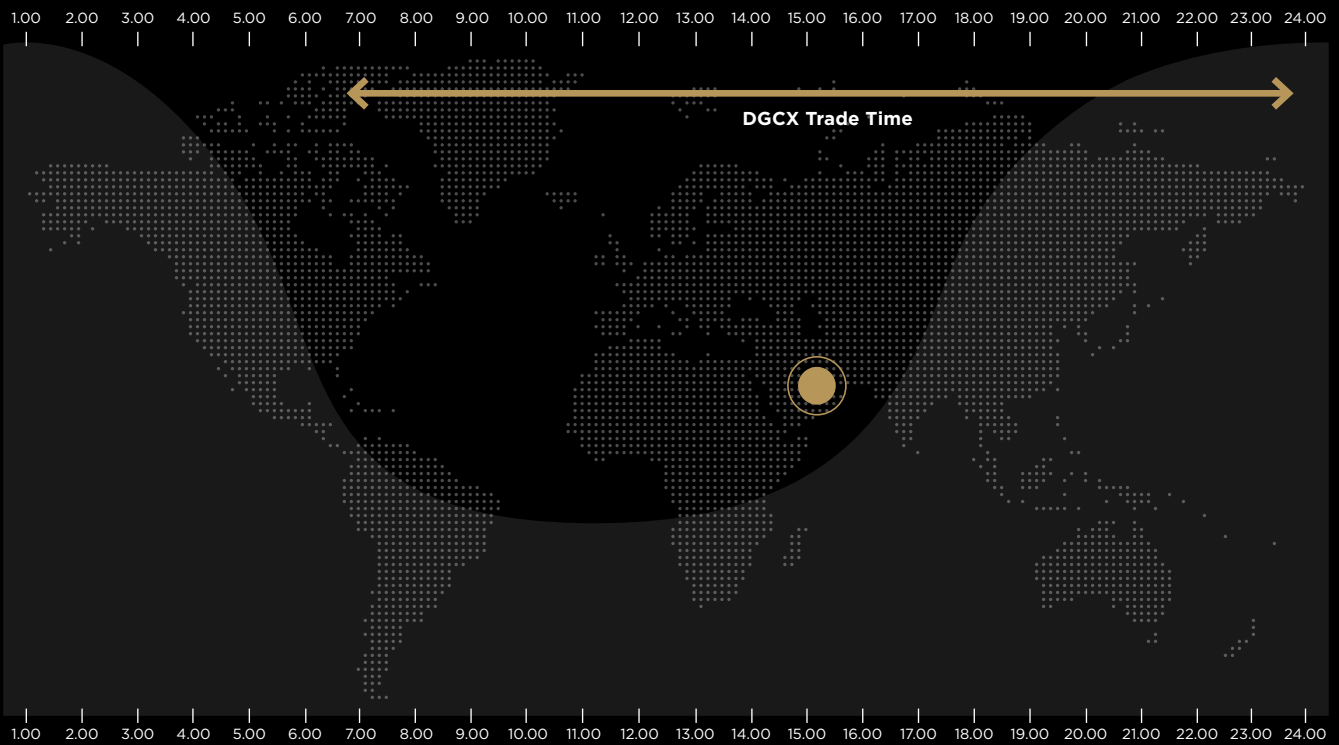

To establish Dubai as a critical link in the global derivatives network.

## The DGCX's clearing house offers secured settlements, robust risk management, and international access.

## Trading Hours

**DGCX's trading hours are 7:00 am to 11:55 pm UAE (GMT +4), spanning global markets**

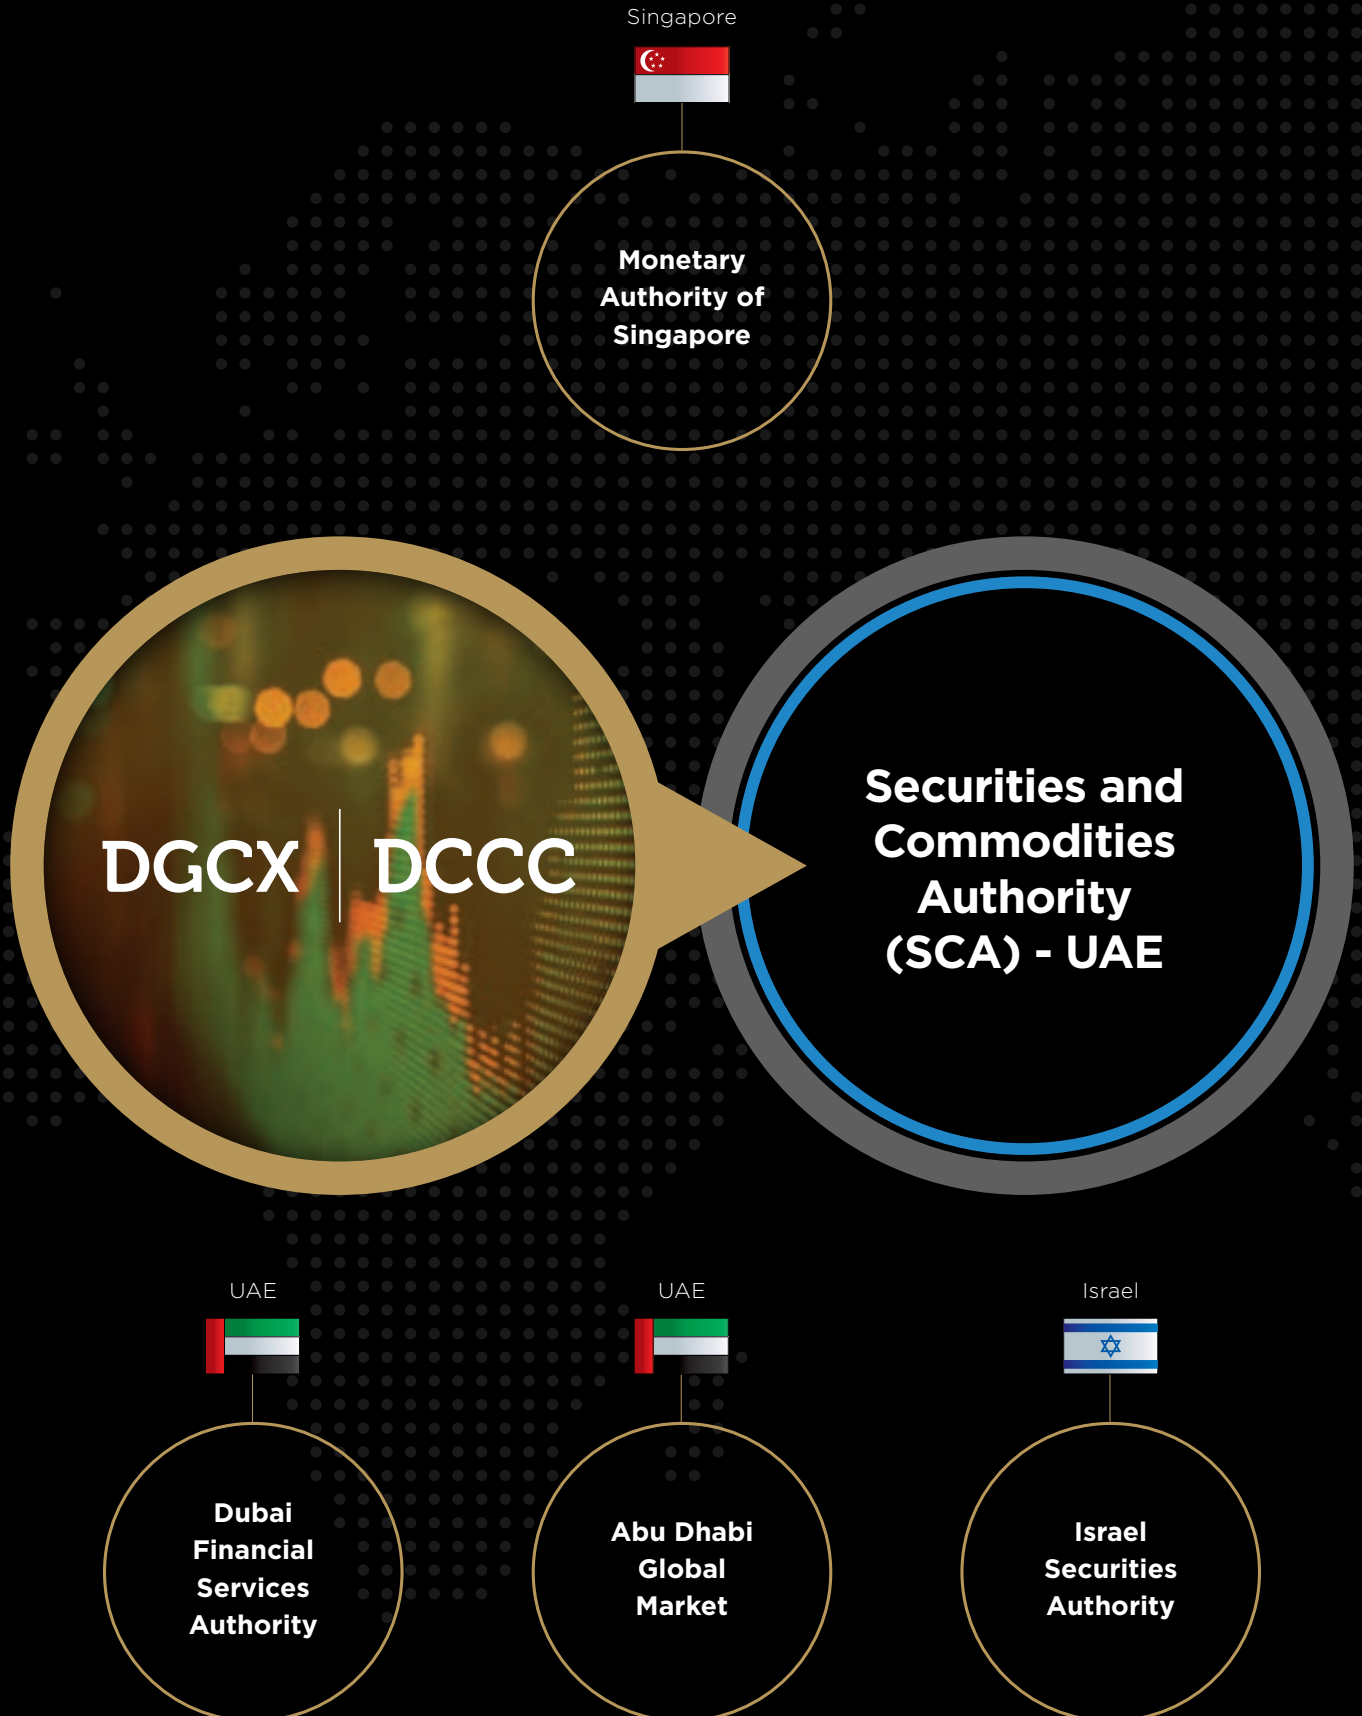

A highly regulated derivatives trading and clearing platform, which has global credibility and a proven settlement track record. More than 140 million contracts traded and cleared since inception.

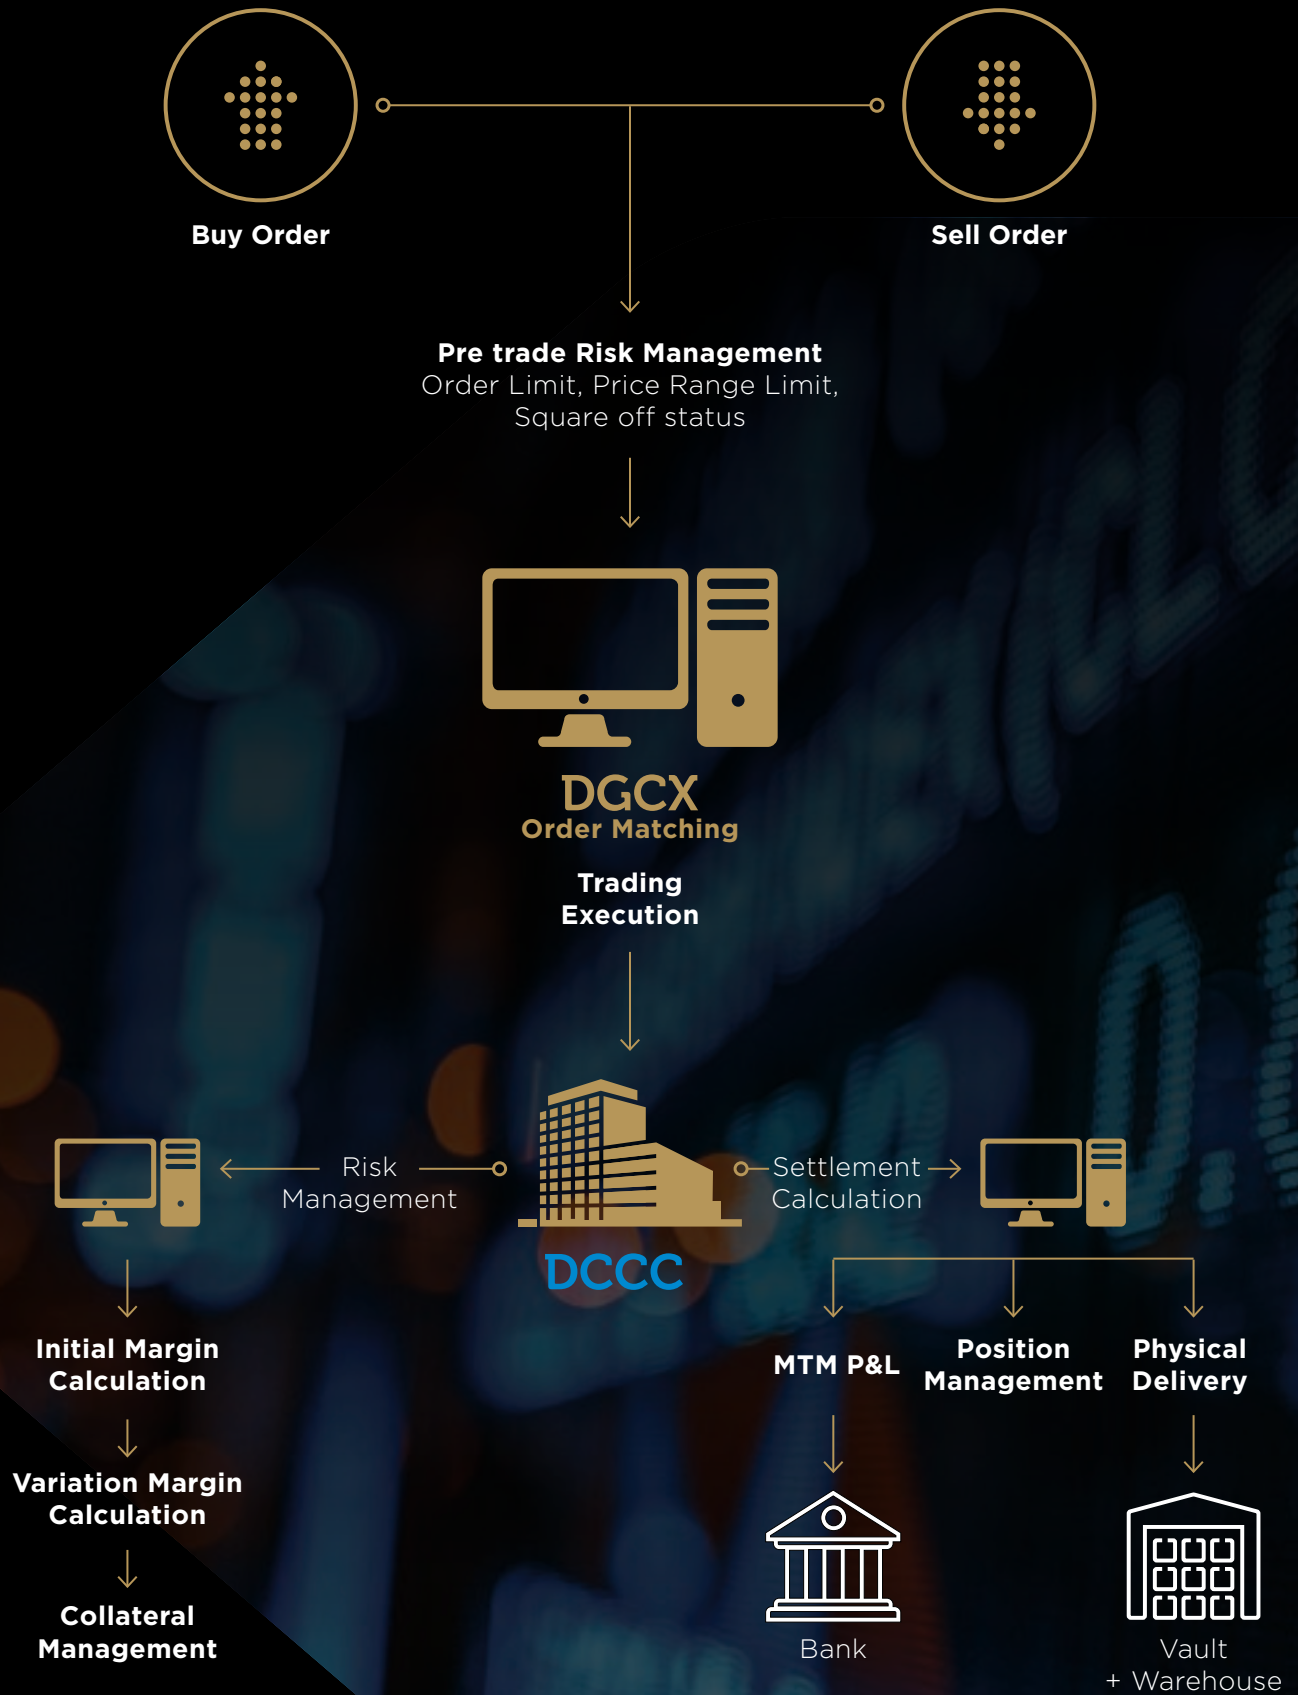

Tax efficient environment global business transacted and cleared in the UAE with funds domiciled in the region, offering the benefits of the local tax landscape.

## Regulatory Framework

Our members get the assurance of a highly regulated derivatives trading and clearing platform, which has global credibility and proven settlement track record.

## DGCX Technology & Connectivity Solutions

DGCX seeks always to partner with leading technology providers to provide a full suite of integrated marketplace solutions to meet the sophistication requirement of regional and global trading communities.

These will include multi-asset trading:

- Real-time clearing capability
- Pre-trade risk management
- Superior transaction speed
- Enhanced trading and clearing functionalities
- Market Intelligence
- Market surveillance
- and quality assurance applications required to safeguard the integrity of the market.

DGCX offers its members and traders access to its market data network with reliable, robust, and cost-efficient connectivity

DGCX offers a “first-class” Tier 3 data center with co-location services.

## DGCX Market Data

DGCX Market data contains the information that includes quotation, price, volume, and other market data in respect of major derivatives instruments such as Currencies, Equities, Metals and Hydrocarbons traded on DGCX.

The market data helps to address the financial decision and trading functions, such as, Valuation, Research Analysis, Compliance and Risk-Management requirements.

The DGCX market data classifies into:

- Level 1, displays single best Bid-offer-volume quotes in real-time
- Level 2, displays the five best Bid-offer-volume quotes in real-time
- Full Depth, which displays all limit real-time orders data

DGCX also provides raw data that can be derived into various datasets, gaining deeper insight into market analysis and trading decisions.

DGCX offers simple and upfront licensing solutions such as, licensing for organisations- Display and non-Display, Distribution License- Data Vendor, and Customised license- Raw and Historic data.

DGCX provides a Market Data Platform (MDP) to optimize operations and onboard quickly via multiple flexible API technology formats and approved Data-Vendor connectivity.
